IS EXTENDED OPTION

Additional Time in the Big Congor Deal.

BUYING A \$400,000 GROUP

Hill groups at Bingham and from which the present owners of the territory will, it is said, derive about \$400,000, has been granted a thirty-day extension of its bond on the Congor, and to consummate the undertaking is at present working with a big Eastern crowd. Much of the territory in the transaction has already been subjected to expert examination. with results that are characterized as quite favorable. The Congor has long been recognized as a mine ready, under been recognized as a mine ready, under favorable conditions, to begin the re-imbursement of its owners, while upon the property of the Midland some very high grade ore has been exposed. As much may be said of the Illinois and Copper Hill, although systematic development has been wofully lacking on all save the Congor. United the posses-sions embraced in the undertaking constitute one of the biggest of Bingham's possibilities. The territory is right in line with that upon which the Columbia group has been developed, while the work, as far as it has progressed, reveals the general characteristics of the camp. In the Congor alone Manager Bothwell says there is exposed at this time no less than 200,000 tons of ore, and should those who have it under option fail to jingle on the mahogany before the option expires the present owners will resume operations and ex-ploit its resources, as has been done by the neighbors.

SACRAMENTO DIVIDEND.

Transfer Books on the Regular Payment Close Today.

The transfer books will close today on the Sacramento company's March dividend, the \$5000 distribution to take place on Tuesday next, when the total from that source will have reached \$193,-000, the quicksilver which is now being sweated from its ores furnishing the bread money on this occasion and constituting the first dividend ever de-rived from the mining of mercurial ores in the State. It was the presence of that class of ore that inspired those who were present at the christening of Mercur. Meanwhile the quicksilver for another distribution in corresponding amount is in the company's storeroom, while the presence of warm weather suggests additional retorts in which to reduce the mercurial ores, of which it is estimated that \$200,000 is now exposed, on a more extensive scale. All the while the leaching of gold from the main class continues without any sign of diminution.

GOT SOME ORE.

Galena Carrying Silver and Gold in the Majestic of Park. (Special to The Tribune)

PARK CITY, Feb. 25 .- C. S. Rolph of the Park City Majestic Mining company, together with a mining expert from Salt Lake City, visited the Majestic yesterday Lake City, visited the Majestio yesterday and brought back the finest lot of samples over seen here from the property. They come from the bottom of the shaft, about thirty feet below the surface, where two feet of splendid gold and galenabearing quartz shows up, and are intended for display at the company's office in Salt Lake. The sack of specimens shown by Mr. Rolph are a magnificent species of quartz, literally shot up and filled with pleces of galena of varying sizes. Tests have been made from the portion of the mine from which the samples were extracted, and show that the galena assays 15 ounces silver and 56 per cent lead, and that the quartz runs from \$1.50 to \$5 in gold.

The visitor who accompanied Mr. Rolph speaks in highest praise of the Majestic and says that the showing already revealed in the shaft and tunnel, the surface indications and the formation warrant the expenditure of money. The continual occurrence of values in the country porphyry in the tunnel crosscut and the marvelous mineralization of the whole country lead the management to believe that when the galena ore chute, for which they are drifting and which outereps on the hill above conspicuously, is reached another bonance with the opened to the speak to the state of the above conspicuously, is reached, bonanza will be opened to the

COST OF UTAH COPPER.

Highland Boy Product Holds the World's Record at Present.

The "editor" of a Boston market letter says: "Utah Consolidated is expected to have the extension to its amelter completed about June 1st, and will then be able to increase its present output about 40 per cent. Amalgamated people are in-clined to be enthusiastic over the success they have achieved with Utah. They be-lieve that they are making copper at about the lowest cost maintained by any mining company in the world. Two or three years ago it was frequently stated that the Utah Consolidated smelter was not properly constructed to receive that the Utah Consolidated smelter was not properly constructed to permit the economical extraction of values from its ores, it using reverberatory instead of blast furnaces. In this connection it is interesting to note that after a thorough investigation of several smelting plants,

TO GURE ANY DISEASE.

The Cause Must Be Removed, Same Way With Dendruff.

Way With Dandruff.

Kill the germ that causes dandruff, falling hair and baldness, you will have no more dandruff, and your hair must grow luxuriantly. Newbro's Herpicide not only contains the dandruff germ destroyer, but it is also a most delightful hair dressing for regular toilet use. No other hair preparation is on this scientific basis of destroying the dandruff germs. It stops all irritation, keeps the scalp sweet, pure and wholesome. Remember that something cialmed to be "just as good" will not do the work of genuine Herpicida. Sold by eading druggists. Send ice in stamps for sample to The Herpicide Car

THE DAY ON 'CHANGE.

Con. Mercur Moves Up Its Pegs, With Shorts Chasing the Judge.

The day on the mining exchange closed with the sale of 25,966 shares of stock for \$4063.63, and with the more active traders generally weak, although the energetic indeavors of the shorts to cover held Daly Judge up to \$4.10, while orders for Daly West were filled at \$34. Con. Mercur Bonanza.

Boston Copper Market.

(Special to The Tribune.) (Special to The Trioune.)

BOSTON, Feb. 2.—There is quite a change in sentiment on copper shares. The demand for these stocks has been good all day and offerings light. The tendency of the traders was to advance prices, which moved along quite easily. The strength in Amalgamated was the making of a better feeling all around. Prices tonight are about a point above last night's level and closed strong.

SIGNED UP CONTRACT.

A Flash From New York Tells of Cactus Agreement.

A bulletin from New York during the afternoon says the agreement between Samuel Newhouse and the American Smelting and Refining company, by which the latter is to reduce the product of the Newhouse concentrator out of Frisco, has been signed up and that the fortunate owner of the Cactus group of mines will leave for the West in a few days. While nothing to verify it has reached the local offices of Mr. Newhouse nor those of the smelting company, there is no reason to challenge the statement, as the principals have been working to this end for several days in New York. Meanwhile Mr. Moser, the mechanical engineer on the Newhouse staff, has the working plans all in hand, and an order to proceed with the letting of contracts for structural material is likely at any hour. Smelting and Refining company, by

MR. SIEBERT'S VISIT.

Superintendent of Big Nevada Property on His Way East.

Fred J. Siebert, general superintendent of the Tonopah Mining company's Nevada bonanzas, left for the East during the afternoon, after a few hours as the guest of W. G. Lamb, the company's resident representative. Mr. Siebert has been in Idaho conducting an examination of mining properties for Philadelphia investors and, reporting to them, will continue to New York, where he will confer with interests in the Tonepah. With others he is very much pleased with the progress being made in the construction of the branch line of railway between Tonepah and Rhodes, over which the ores of his company will find an outlet, and with this in operation will be prepared to put out the moneys for dividends. While his sojourn in Sait Lake was brief, the friends of Mr. Siebert made it a pleasant one. guest of W. G. Lamb, the company's resi-

THE NEVADA PARK.

Promising Company Favorably Launched by Provo Talent.

(Special to The Tribune.) PROVO, Feb. 25.-Articles of incorpora-tion of the Nevada Park Mining company have been filed with the County Clerk. The general offices and headquarters of the new company will be at Provo City.

The capital stock of the corporation is \$500,000, divided into shares of the par value of \$1. The incorporators, with the amount of stock held by each, are as follows: Jesse Knight, 245,000; Lafayette Holbrook, 25,000; R. E. Allen, 100; Samuel A. King, 25,000; J. J. Knight, 100,000; C. O. Newell, 100,000. The officers elected for the first year are: Jesse Knight, president and director; L. Holbrook, vice-president and director; R. E. Allen, secretary, treasurer and director; S. A. King and J. J. Knight, directors. The new company owns the Summit, the Roadside and the Sam Tilden lode mining claims and the following unpatented claims: The Tilden No. 2, the Elbow, the Honestead, the Harum mine and the Harum No. 1, the Block Jack, the Brawshaw and an undivided half interest in the Teddy mine, all situated in Lincoln county. State of Nevada. have been filed with the County Clerk.

BULLION FROM DIXIE.

Two Carloads Now in Transit-Heavy Consignments of Coke.

(Special to The Tribune.) MODENA, Feb. 25.-Two carloads copper builion have been received at Modena during the past week from the Utah dena during the past week from the Utah and Eastern Copper company's smelter at Shem City, out of St. George. This company is now employing seventy-five men. At the Dixle mines the shaft has now attained a depth of 775 feet, disclosing wonderful bodies of copper carbonate ores. Thirty-three carloads of coke have been received at Modena during the past thirty days for smelter use, the major portion of which comes from Cokeville, Pa., and a great deal of it from Thurman, W. Va. The Strevell-Paterson Hardware coma great deal of it from Thurman, w. va.
The Stravell-Paterson Hardware company of Salt Lake City has filled their
magazine at this point with giant powder,
in anticipation of the unusual activity in
mining which is bound to prevail at Modena, Stateline, Fay and adjacent camps.

ONE MORE IN LINE.

Tonopah Adds Another to Its List of Producing Mines.

The station in the shaft of the Tonopah Extension at a depth of 400 feet was conpleted this week with the putting in of the necessary timbers, and the work of sinking the shaft and driving the north crosscut was again taken up and will be pushed with all vigor, says the Tonopah Bonanza. The shaft is now down fifteen feet below the station and the crosscut is in ninety feet. On the upper level—at \$15-a cut was started in the drift, seventy feet from its entrance, to reach the hanging wall, and although it has proceeded through ten feet of ore the wall has not yet appeared in sight. The ore, however, holds up to the standard reported last week and gives no evidence of depreciating either in value or extent. Twenty tons of ore has been sacked for shipment and will likely be forwarded the coming week. pleted this week with the putting in of the

COCONINO ON TRIAL

Story That It Will Be Given Another Chance to Assert Itself.

It was said yesterday that arrangements have been made by which the Coconino copper deposits in the sandstone at Camp Ryan on the Arizona-Utah strip will be given an opportunity to demon-strate their commercial worth. To this end it is said that the discordant elements end it is said that the discordant elements in the organization have agreed to bury the hatchet, the reclamation of the proposition to be assigned to a new management. The deposits were several years ago equipped with what is known as a "Neill process?" for the leaching of the metal from the sands, while along with it was a furnace. The process, however, has not "proceeded" and the furnace has accordingly had nothing to reduce.

Ore and Bullion. In the ore and bullion market the day's settlements amounted to \$85,300, McCornick & Co. reporting them as they follow: American bullion, \$49,500; gold builton, \$1200; gold, silver, lead and copper ores, \$33,500

In the metal market sliver ruled at 57% cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at 11% cents

DALY WEST REPORTS

President's Added to Those Already Exhibited.

IN THE LOWER WORKINGS

Wealth of the Ledges Is Not Very Great.

Shaft Rapidly Descending to Great Depth-Shareholders Congratulated on Dividends in Sight.

To reports that were spread before the shareholders of the Daly West of Park City at the annual gathering in Park City has been added since their adjournment that of President Jacob E. Bamberger, this to appear with others in the pages of the official exhibit which Secretary Mountney is assured will be ready for mailing today. In his report President Bamberger, after brief reference to those submitted by his staff, says the feature of developments the present season will be the sinking of the main shaft from the 1400 to the 1700-foot level, it having already been demonstrated by winzes that have dropped down with the ledge that the company's wealth continues to even greater depts. A gratifying feature of President Bamberger's report is that in which the shareholders are assured that which the shareholders are assured that values have been agreeably maintained as lower levels have been fathomed, while the volume on those levels assures the steady distribution of dividends for an indefinite period.

In addition to these evidences of con tinued thrift, the enlargement of the mill and the installation of a plant with which to make the tailings disgorge their metals afford abundant assur-ance of increased earnings, while remaining unexplored is a large amount of territory that should be made as productive as that from which over \$3,700,000 in dividends with a surplus exceeding \$450,000 has been mined. Superintendent John A. Kirby, who has been sojourning in California for several weeks, is scheduled to return to town today.

BALAKLALA SMELTER.

Report That Means Have Been Provided for Its Construction.

A telegram from Chicago announces he arrival in that city of Willard F. Snyder, president and general manager of the Western Exploration company, after an absence of a month or more among the multi-millionaires of New York and Boston, without reference to his wealthy associates from Pennsyl vania. It was said yesterday that Mr. Snyder is bringing with him sinew with which to provide at once for the equipment of the Balakiala group of mines in Shasta county, Cal., of which the Western Exploration company ex-ercises control, and that a smelter will be erected the present season. Accordone erected the present season. According to those who have had access to the report, the examination conducted by Capt. Duncan MacVichie a short time ago developed the presence of 2,500,000 tons of ore, while since that examination was terminated the management tion was terminated the management has opened up bodies at several other points, some of them showing very high percentages. The MacVichie findings, it is said, fixed the general average of the tonnage which came under his observation at 3 per cent copper with \$1.50 in gold and silver, and with these enormous resources the company will have soon added another string of producers. President President Snyder is expected early next week.

THE HONERINE MILL.

Limbering Up of the New Stockton Plant Now in Progress.

While the active crushing of ores and the production of concentrates did not begin at the Honerine's new \$80,000 mill out of Stockton yesterday, Superintendent Raddatz talking from the diggings says the machinery is being gradually limbered up and that the whole will be in commission within the next few days. Superintendent Raddatz, though somewhat disappointed, is not the least upset by the delays that have interposed, for he has witnessed the troubles of his neighbors who are wondering why a new machine insists on being warmed up before settling down to a graduate's work. Not many days will be required, however, to get at results for which the plant was designed.

Mining Notes.

Joseph Dederichs left for the diggings again last night. Frank Morehouse leaves for the south-ern country tonight to conduct an exami-nation of mining property for Salt Lake clients.

Increased activity in the shares of the Victoria Mining company of Tintic is re-garded as a sign of returning life in that becality. locality.

Superintendent Hazelton of the United States smelter came up from its furnaces during the day to confer with the management,

James A. Pollock, president of the min-ing exchange and manager of the Tetro of Tintle, left for Boston yesterday on im-portant business.

of Tintic, left for Boston yesterday on important business.

Managing Director Holden of the United States Mining company leaves for his camps again tonight, with a number of surprises awaiting him.

Much local interest is manifested in the approaching meeting of Utah-Apex shareholders in the East, while a most spirited contest is promised in the organization of the new board of directors.

James A. Hogie left for Bingham yesterday merning, accompanied by a party of mining men who have interested themselves in the big camp of copper.

John E. Du Bols, Charles J. North and L. A. Amsden, officials of the Blackbird Mining company, have gone to its properties out of Frisco, after which future developments will be decided on.

A. W. Tibbals, who will superintend the developments will be decided on.

A. W. Tibbals, who will superintend the development of the Goldfield Vindicator group at Goldfield, Nev., is in the city on his way to camp. Mr. Tibbals, who has been operating in Arizona, is the guest of his brother, W. H. Tibbals.

Messrs, D. H. Peery and Clarenco K. McCornick left for California yenterday, their destination the Gold Roads mines and mill out of Kingman, Ariz. While there the gentlemen will make an examination of neighboring properties that have been commended to them, and in the event that it stands up to representations another southern proposition will be operated out of Salt Lag

ASSESSMENT NO 6.

Ajax Mining company. Office and principal place of business, Sait Lake City, Utah. Notice is hereby given that at a meeting of the board of directors of the Ajax Mining company, held on the 20th day of February, 1904, an assessment of five (5) cents per share was levied upon the capital stock of the corporation, issued and outstanding, payable immediately to the secretary at his office, room 305 Dooly block, Sait Lake City, Utah. Any stock upon which this assessment may remain unpaid on Tuesday, the 22nd day of March, 1904, will be delinquent and advertised for sale at public auction, and unless payment is made before, will be sold on Wednesday, the 18th day of April, 1904, at Il o'clock a. m., at the secretary's office, to pay the delinquent assessment thereon, together with the costs of advertising and expense of sale.

By order of the board of directors.

J. M. BURT, Secretary.
305 Dooly block, Sait Lake City, Utah, s1554

The Smooth Road

to St. Louis.

And it's smooth all the way.

Incidentally, the Burlington is the only railroad running its own trains over its own rails Denver to St. Louis.
